

**Adam Lauricella** Graceland Tattoo

"I prefer the TATSoul Envy Traditional Needles to others on the market. These needles are extremely consistent. Their traditional groupings hold ink very well. Simply put, Envy Traditional 9 liners makes bold, single pass outlines helping to give my tattoos the look I want."

**Ryan Hadley** Ryan Hadley Studios

"These are the most consistent needles I've ever used. They are perfect for getting those smooth blends (color, black & gray). The Wrath Tubes are an industry best for disposable tubes as well!"

**Joey Ortega** Triple Crown Tattoo

The Envy Needles, particularly the textured magnums and the traditional liners, are also a favorite of mine as well. I've been using the textured mags since the company introduced them and I've never used another needle for color since. They have allowed me to work efficiently with my powder based inks so that each tattoo I'm working on can be colored quickly and solidly. The longer taper of the needles have allowed me to layer my colors without causing unnecessary trauma to the skin. The traditional lines are perfect for a clean, consistent, bold line. I absolutely love the needles and the tubes, as well as many of the other products that TATSoul provides.

**Dan Smith** Captured Tattoo

"I have over 12 years of traveling and working all over the world. Knowing I can rely on my tubes and needles in all of those crazy situations or even just day to day work when you're at home is the reason I will continue to use TATSoul. There is no substitution for quality."

**Jon Montalvo** San Marcos, TX

"TATSoul Textured Magnum Needles are the best needles I've tried, by far. They are super smooth and consistent. I also find that I get the best whips and color saturation. I also like their liners; the traditional 9L and 14S helps me create super crisp, clean lines fast! These needles allow me to work fast with less trauma to the skin, yet I can still get super bold lines. Thank you TATSoul for supplying me with the best needles!"

**Bili Vegas** Tattoo Afterlife

"Once I started using Envy Needles and Wrath Tubes I immediately took note of a few things. The needles are extremely consistent; groupings are identical from needle to needle, and always fit their respective tubes properly. Secondly, I noticed that the Envy Needles do not dull as quickly as many other brands. I usually change needles a couple of times throughout a tattoo, now I find myself making it through tattoos on a single Envy Mag Needle. Thanks TATSoul!"

## Envy Standard Needles

Our Envy Standard Needle line includes liners, extra tight liners, round shaders, magnums, and curved magnums - all standard #12. Featuring a long taper which allows for moderate saturation, these needles are ideal for color blending as well as black and grey work.

### Standard Liners & Standard Extra Tight Liners

Our Standard Liner Needles are tight, while our Extra Tights feature an even tighter grouping, longer taper, and slightly shorter tip-to-solder length.

Liner Configurations Available: 1r, 3r, 5r, 7r, 8r, 9r, 11r, 14r  
Extra Tight Liner Configurations Available: 3t, 5t, 7t

### Standard Round Shaders

Our Standard Round Shaders feature a looser grouping and are most commonly used for shading and color blending.

Configurations Available: 3s, 5s, 8s, 11s, 14s, 18s

### Standard Magnum

Our Standard Super Magnum Needles (15m & up) feature a patent pending acute angle cut into the back of the needle grouping which allows for a more fluid ink flow. All of our magnum needles are weaved which allows for more even and consistent needle-to-skin contact.

Configurations Available: 5m, 7m, 9m, 11m, 13m, 15m, 23m, 25m, 29m, 39m

### Standard Curved Magnum

Our Standard Curved Magnum Needles have a subtle curve which allows for all of the needles in a grouping to contact the skin.

Configurations Available: 5cm, 7cm, 9cm, 11cm, 13cm, 15cm, 23cm, 25cm, 29cm, 39cm, 45cm, 49cm

## Envy Textured Needles

Our Envy Textured Needles include liners, round shaders, magnums, and curved magnums - all standard #12 with a long taper. Our Textured Needles contain microscopic grooves which allow the needles to hold more ink, leading to greater saturation. Envy Textured Needles are ideal for color packing and commonly used in traditional and Japanese / Irezumi styles.

### Textured Liners

Our Textured Liners are tight liners.

Configurations Available: 1r, 3r, 5r, 7r, 8r, 9r, 14r

### Textured Round Shaders

Our Textured Round Shaders feature a looser grouping.

Configurations Available: 3s, 5s, 8s, 11s, 14s, 18s

### Textured Magnum

Our Textured Magnum Needles are weaved which allows for more even and consistent needle-to-skin contact.

Configurations Available: 5m, 7m, 9m, 11m, 13m, 15m, 23m, 25m, 39m

### Textured Curved Magnum

Our Textured Curved Magnums have a tight grouping and a subtle curve, which allows for all of the needles in a grouping to contact the skin.

Configurations Available: 5cm, 7cm, 9cm, 11cm, 13cm, 15cm, 23cm, 25cm

## Envy Traditional Needles

Envy Traditional Needles include liners and magnums. Traditional Magnums are available in either Standard Traditional or Whipped Traditional - both of which are #12. Our Traditional Liners are designed to create a bolder line with more loose grouping. They feature a long taper and our Traditional Shaders/Mags utilize a bullet tip (short taper). These needles are ideal for color packing and are commonly used in traditional, neo traditional, and Japanese styles.

### Traditional Liners

Our Envy Traditional Liners feature a looser grouping and a long taper, ideal for creating bold lines.

Configurations Available: 5r, 7r, 8r, 9r, 11r, 14r

### Standard Traditional Magnum

Our Standard Traditional Magnums are grouped tightly, weaved, and feature a short taper.

Configurations Available: 5m, 7m, 9m, 11m, 13m, 15m, 23m, 25m

### Curved Traditional Magnum

Our Curved Traditional Magnums have a tight grouping and a subtle curve, which allows for all of the needles in a grouping to contact the skin.

Configurations Available: 15cm, 23cm, 25cm

### Whipped Traditional Magnum

Our Whipped Traditional Magnums are weaved with a short taper. They are textured for maximum ink flow and polished at the tip for whip shading.

Configurations Available: 5m, 7m, 9m, 11m, 13m, 15m, 23m, 25m

### Curved Whipped Traditional Magnum

Our Curved Whipped Traditional Magnums are weaved with a short taper. They are textured for maximum ink flow and polished at the tip for whip shading. They also include a subtle curve which allows for all of the needles in a grouping to contact the skin.

Configurations Available: 15cm, 23cm, 25cm

## Envy Bugpin Needles

Envy Bugpin Needles include liners, magnums, and curved magnums - all of which are #9 (an industry first). These smaller gauged, tighter grouped needles are ideal for portrait work, black and grey, and soft blending.

### Bugpin Liners

Our Bugpin Liners feature needles with a smaller diameter, which results in an even tighter configuration. Bugpin Liners are made with a slightly longer taper than standard liners.

Configurations Available: 3r, 5r, 7r, 8r, 9r, 14r, 18r

### Bugpin Magnum

Our Bugpin Magnums feature a smaller needle diameter, tight grouping, and slightly shorter taper. They are also weaved for optimal needle-to-skin contact.

Configurations Available: 7m, 9m, 11m, 13m, 15m, 17m

### Bugpin Curved Magnum

Our Bugpin Curved Magnums have a tight grouping and a subtle curve, which allows for all of the needles in a grouping to contact the skin.

Configurations Available: 7cm, 9cm, 11cm, 13cm, 15cm, 17cm

## Envy Apex Hollow Needles

TATSoul Envy APEX Liners retain the same great qualities expected of the rest of our Envy lines, but are specially designed with a unique hollow center which allows for optimum ink flow. This design allows APEX liners to generate crisp lines and minimize skin damage.

### Liners

Our APEX Liners feature a unique hollow center, in addition to a longer taper and a longer tip-to-solder length.

Configurations Available: 6al, 8al, 10al

### 30 Point Needle Inspection Checklist

1. Needle Sharpness
2. Consistent Grouping
3. Consistent Alignment
4. Even Solder Distribution
5. Lead-Free Solder
6. Consistent Tip-to-Solder Length

## Quality You Can TRUST

For nearly a decade, we at TATSoul have been dedicated to producing superior needles for professional artists. We examine each individual needle to ensure ideal tip sharpness, grouping diameter, and alignment. Our solder is lead free, and specially inspected to ensure an even and consistent distribution. Our standards are so demanding, that more than half of the needles we manufacture don't make the cut. Those that do, must also pass through artist-testing in order to earn the name Envy. Our artists expect the best from Envy Needles - a responsibility we take very seriously.
